## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1 and 4-19 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claim 1 has been amended to include the limitation that the omni-direction magnification lens is substantially spherically while the second surface of the omni-directional magnification lens is substantially planar. Further the magnification lens is mounted to and surrounded by an ambient light-blocking shroud. This was not taught in the prior art. Mastnak's counterfeit detection device magnifying lens is cylindrical and further Mastnak does not teach the light shroud of the present invention. Although both the spherical lens and the shroud are well known in the magnifying arts, the combination is not well known and there is no motivation besides hindsight to combine these two things with the teaching of Mastnak. Therefore claim 1 as amended is allowed. Claims 4-10 are dependent on amended claim 1 and are therefore also allowed.

Independent claim 11 claims the subject matter of original claim 1, plus the additional feature that the lens shroud and lens are pivotal, so that the lens shroud and lens can be pivoted away from the counterfeit detect device, so that an user can directly view the document for viewing such features as watermarks and the like unmagnified with the document. This is shown in figure 8 of applicant's drawings. The only prior art device that would possibly have a function like this is that of Mastnak, however, Mastnak clearly does not teach a method of removing the lens from the counterfeit detection device. Further in similar related viewing devices with magnifiers such as cameras with

shrouded viewfinders; a breakaway shroud and magnifier is not well known and it would not necessarily be obvious to combine one with Mastnak to produce a counterfeit detection device that functions in the manner shown in figure 8 of applicant's drawings. Since the prior art or record does not teach such a pivotal feature, claim 11 is allowed. Claims 12-19 are dependent on claim 11 and are therefore also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
